

Marshall Early Childhood Center

Mrs. Lesley Glanton, Principal

Ways to stay safe at your school.

Covid-19 is caused by a germ (virus) that can make your body sick. People who have it may have a cough, fever, trouble breathing, may not feel sick at all or may have mild symptoms.

Wear a mask

Cloth mask should be washed each day and paper mask should be disposed each day. Mask should cover nose and mouth. You must keep your coverings on while you're at school.

Wash your hands with soap and water or use hand sanitizer everyday.

Keep your hands away from your face. Do not touch your eyes, mouth or nose.

Social distance at school.

This means you should stay 6 feet apart, do not hug, high 5, or hold hands with friends.

We want you to come to school, be safe and learn so you'll be ready for Kindergarten!
